

Open Hand Shield

- This shield resembles a paddle with a cuff. It is used to protect the top of the hand. One-size fits all with a lead-equivalency of 0.5mm.
- CODE: GL-OH

Open Palm Mitts

- These mitts are primarily designed for veterinary applications where fingers and thumbs are available to be used in a procedure. One-size fits all with a lead-equivalency of 0.5mm.
- CODE: GL-OP

Open Palm with Thumb

- Identical to the Open-Palm Mitt with a closed thumb. One-size fits all with a lead-equivalency of 0.5mm.
- CODE: GL-OPT

Ducky Mitts

- These mitts are designed for veterinary applications where fingers and thumbs must be protected. One-size fits all with a lead-equivalency of 0.5mm.
- CODE: GL-DM

Closed Mitts with Thumb

- Similar to the Ducky Mitt without the finger pouch. One-size fits all with a lead-equivalency of 0.5mm.
- CODE: GL-DMT

Standard Colour: Royal Blue
Optional colours are available.

Hennessy and Roufus Approved

* Different colours shown are for deliniation purposes only.

VET MITTENS

- This shield offers lead-equivalency of 0.5mm while positioning animals during procedures. Combination of Velcro wrist strap and non-slip material on palm prevents slippage while securing your patient.
- For more Glove designs, please turn to the last page.
- CODE: GL-VM

PET TRANSPORTER

- A safe and secure way to move patients easily.
- Sturdy fiberglass poles with rubber handles.
- Stain-resistant nylon with 2" webbing and adjustable buckle reinforcement.
- Code: VPT

VETERINARY SANDBAGS with/without handles

- Sandbags are rectangular in shape. An inner bladder is filled with sand and then inserted into a blue nylon or vinyl bag.
